### Details

- Web-based computer-assisted coding system designed to improve outpatient, ambulatory and professional services coding
- Advanced natural language processing (NLP) automatically provides accurate CPT® and ICD codes from physician's report to optimize accurate reimbursement
- Streamlined coding workflows and reporting improve coder efficiency and accelerate revenue cycle

Computer-assisted coding software for outpatient, ambulatory and professional fee services.

The 3M™ CodeRyte™ CodeAssist™ System is a web-based system that leverages advanced NLP to examine the full text of a physician's report and automatically assign accurate CPT ® and ICD codes. By identifying correct billing codes and streamlining the coding workflow process, organizations can improve compliance and efficiency while reducing denials, A/R days and total cost to collect. Many of the nation's top hospitals, physician practices, billing companies and multi-specialty clinics use 3M CodeAssist as the foundation of their coding operations.
